

Hielda Launch Runbook

Everything already done stays done — assets, video, shoutouts, badge. This page is only what's left: Tuesday night, launch day, and the day after. Tick things off as you go; the page remembers.

LIVE: WED 2 SEP · 08:01 UK

TUESDAY EVENING

1 Sep — the prep that decides Wednesday

- ☐ **Message every user, friend and supporter — individually**
Not a broadcast. "I launch on Product Hunt at 8am tomorrow — a comment about your experience would mean a lot." Comments count far more than upvotes; PH downweights vote-only drive-bys.
- ☐ **Final draft check**
Video plays · five gallery images in order · shoutouts saved · maker comment copied somewhere handy (launch kit §1).
- ☐ **Early night**
Genuinely. The morning is the whole game.

WEDNESDAY

2 Sep — launch day

- ☐ **08:01 — Go live, maker comment within the first minute**
It's pre-written in the kit. Paste it, don't rewrite it at 8am.
- ☐ **08:00-14:00 — Stay at the keyboard**
This window largely decides ranking. Votes are hidden for the first ~4 hours, so ignore the score — watch the comments and reply to every single one within minutes, personally.
- ☐ **Thank Tuesday's people by name when they comment**
- ☐ **Low-key mentions — only where you're known**
"Launched the invoice tool I've mentioned before — happy to answer questions." Never cold-drop links in communities with no history; it gets flagged.

☐ **Have the two stock answers ready**

"Is charging these fees legal?" — yes: Late Payment of Commercial Debts (Interest) Act 1998, 8% + base rate plus a £40–£100 fixed fee, no contract clause needed. "How is this different from X?" — the UK statutory enforcement layer plus your sign-off on every email.

☐ **Evening: last comment sweep before bed**

THURSDAY

3 Sep — the day after

☐ **Email everyone who commented to say thanks**

☐ **Harvest every piece of feedback into a list**

Launch comments are free user research — capture them before they scroll away.

☐ **Check PostHog**

Look for the producthunt.com referrer — how many came, and what they did next.

On-call: open a Claude session any time on Wednesday — for watching PostHog while you work the comments, drafting replies to tricky technical questions, or shipping a same-hour fix if a launch visitor reports a bug. That's the day a fast fix is worth the most.
